BRAIN INJURY BREAKTHROUGHS

CURRENT ISSUES AND EMERGING SOLUTIONS

In line with this year's conference theme, "Brain Injury Breakthroughs: Current Issues and Emerging Solutions", our focus is to explore the nexus of brain injury with crucial frameworks such as health, governance, and societal fairness and inclusion. Through insightful discussions, we will examine the criminal justice and healthcare systems from a current perspective and provide understanding into the possibilities that can be enhanced through community partnerships and research informed strategies. Speaker topics will include intersectionality of brain injury and the justice, mental health and addiction systems, as well as a profound and transformative presentation by lived experience speaker, Jim Mandelin.

By participating as an attendee, sponsor, or exhibitor, you'll be actively supporting our mission to leverage the strength of community and cooperation to empower individuals affected by brain injury who are often overlooked by existing systems.

We invite you to join us for this pivotal and groundbreaking community event. Together, we're committed to creating a more fair, compassionate, and inclusive community for everyone!

In our ongoing mission to support individuals living with brain injury in the Central and North Okanagan, we invite those who cannot attend our conference to consider donating. Your contributions are vital in empowering the BrainTrust Canada team to enhance and expand their support and educational initiatives within your community. Despite being a leading cause of death and disability, brain injury remains massively underfunded and overlooked. The challenges of fundraising for this cause are significant, as the impacts of brain injury are not always visible, yet it profoundly affects our society - every 3 minutes, someone's life is altered by it. By choosing to donate, you are directly contributing to a cause that touches each of us in extraordinary ways. Support our efforts today and make a lasting difference in the lives of those affected by brain injury.
